

3rd SGH Urology ROBOTIC SURGERY MASTERCLASS

In conjunction with Uroweek 2026

 **16-17 OCT 2026**
FRI-SAT (8.30 AM-5 PM)

 **National Cancer Centre**
Singapore Lecture Theatre

Welcome to the **3rd SGH Urology Robotic Surgery Masterclass!** As robotic surgery continues to evolve rapidly, this year's programme reflects our commitment to advancing robotic urology across all levels of practice. The sessions span foundational teaching for surgeons early in their robotic journey to updates on cutting-edge developments, including single-port surgery and the integration of oncology with reconstructive urology. We also address real-world clinical challenges, such as managing radiation-related complications and unexpected disease upstaging. Beyond technical skills, the E3 Forum focuses on programme implementation, mentorship, and surgeon resilience. We hope this diverse programme offers valuable insights for both trainees and experienced surgeons, fostering learning, collaboration, and innovation. We look forward to welcoming you to UroWeek 2026!
