

Course Title : Urology Resident's Course 2015, Singapore  
Submitted by : Haruka Miyata  
Department/ Institution : Asahikawa City Hospital, Urological department  
Country : Japan  
Date : 20<sup>th</sup> August 2015 (Thursday) to 24<sup>th</sup> August 2015 (Monday)

---

### A) Background

I had been training for three years in Urological department, had not expert examination yet. I'd never participated in international urological community.

### B) Course Objectives

I took part in this course to study the basic knowledge of urology and know what is being carried out abroad.

### C) Lessons Learnt

The first day, I learned about statistics and some technics of operation (laparoscopy, suturing of the intestinal tract, TUR-P, and ureteroscopy). The second and third day, I studied about the every area of urology, renal cancer, bladder cancer, andrology, penile cancer, urinary tract diversion, adrenal tumor and other. Especially, I was interested in the care of penile cancer, which I had never experienced and did not know many about that.

### D) Benefits

I was able to exchange the information with other participants about the care being carried out in foreign countries.

### E) Recommendations

It was a very valuable experience. However, sometime I could not catch speedy English conversations or lessons. I thought that learning English is very important to study more and exchange the information with urologist from over the world.

### F) If you are asked to rate this course over 10, what is your rating?

(1-5 Could be Better (please indicate areas of improvement) 6 - 8 Good 9-10 Excellent)  
8/10

### G) Networking
