

Course Title : Urology Resident's Course 2016, Singapore in conjunction with the 14<sup>th</sup> UAA Congress 2016, co-organized with American Urological Association  
Submitted by : Keishi Kajikawa  
Department/ Institution : Aichi Medical University  
Country : Japan  
Date : 18<sup>th</sup> July 2016 (Monday) to 21<sup>st</sup> July 2016 (Thursday)

---

#### **A) Background**

I know that UAA and URC will be held in the Singapore by the public offering from the JUA. I had participated in an international congress, but have not participated in the workshop of the international society.

#### **B) Course Objectives**

I wanted to share the knowledge with a young urologist in Asia and to exchange information with them.

#### **C) Lessons Learnt**

I could learn wide range of urology fields. Particularly, the contents such as the UDS and the examination of sperm have few opportunities to take lectures in Japan. Therefore, it was very good that I was able to attend the lecture of the field. Furthermore, it was very useful that I was able to experience operation of TUL and the manual skill using the laparoscope with the resident of other Asian countries. And, it was valuable experience that I was able to take an examination of the AUA on the last day.

#### **D) Benefits**

It was meaningful that I was able to exchange information with other Asian residents about medical environment and education environment.

#### **E) Recommendations**

It was the good opportunity when I could realize importance of the English communicative competence.

#### **F) If you are asked to rate this course over 10, what is your rating? 8/10**

**Areas of Improvement (if applicable)** \_\_\_\_\_

---

**(1-5 Could be Better (please indicate areas of improvement)  
6 - 8 Good    9-10 Excellent)**

#### **G) Networking**
