

Course Title: USANZ Trainee Week 2017, Melbourne, Australia

Submitted by: Takamasa Horiuchi

Department / Institution: Misato Central General Hospital, urology

Country: Japan

Date: Sunday, 19th November 2017 to Thursday, 23rd November 2017

A. Background: the final year of urology training

B) Programme objectives: attend the program, get to know each other and medicine overseas.

C) Lessons learnt/Take Home Message

What kind of examinations we do depends on each country. They do for example, PET CT for prostate cancer in Australia. We seldom to do that in Japan. Doctors overseas are really good at discussion and presentation. We should practice that kind of skills.

D) Networking

I could make very good relationships with many doctors not only from Australia but Asian countries such as China, Singapore and Taiwan. I want to keep in touch forever and want to visit their hospital in the near future.

E) Benefits

I get to know medical circumstances abroad, make a good relationship with many doctors. Of course, we enjoyed Australia food, sights and culture.

F) Recommendations

If you have an opportunity to attend this program, you should apply and enjoy the program, make lots of friends there. It has been a so nice week.

G) Photographs with captions
